## 1. Introduction

The Quarterly Labour Force Survey (QLFS) is a household-based sample survey conducted by Statistics South Africa (Stats SA). It collects data on the labour market activities of individuals aged 15 years and older who live in South Africa. However, this report only covers labour market activities of persons aged 15–64 years.

This report presents key findings of the QLFS conducted from January to March 2025 (Q1: 2025).

## 2. Highlights of the results

**Table A: Key labour market indicators**

	Jan-Mar 2024	Oct-Dec 2024	Jan-Mar 2025	Qtr-to-qtr change	Year-on- year change	Qtr-to-qtr change	Year-on- year change

Labour force participation rate	60,7	60,3	60,0	-0,3	-0,7		

*Due to rounding, numbers do not necessarily add up to totals*

The working-age population increased by 130 000 or 0,3% in the first quarter of 2025 compared with the fourth quarter of 2024. The number of employed persons decreased by 291 000 to 16,8 million in Q1: 2025, while the number of unemployed persons increased by 237 000 to 8,2 million compared with Q4: 2024, resulting in a decrease of 54 000 (down by 0,2%) in the labour force. The number of discouraged work-seekers increased by 7 000 (up by 0,2%), and the number of people who were not economically active for reasons other than discouragement increased by 177 000 (up by 1,4%) between the two quarters, resulting in a net increase of 184 000 in the not economically active population.

A decrease in employment and an increase in unemployment resulted in an increase of 1,0 percentage point in the unemployment rate to 32,9% in the first quarter of 2025. The labour force participation rate decreased by 0,3 of a percentage point to 60,0%, and the absorption rate decreased by 0,8 of a percentage point to 40,3% between Q4: 2024 and Q1: 2025.

Employment losses were observed in the formal sector (down by 245 000) and Private households (down by 68 000), while the informal sector and Agricultural sector employment increased by 17 000 and 6 000 respectively in Q1: 2025.

Compared with Q1: 2024, the working-age population increased by 532 000 or 1,3%. Total employment increased by 43 000 persons (or 0,3%), the number of unemployed persons increased by 2 000 and the number of persons who were not economically active increased by 488 000 (or 3,0%).

### 3. Employment

**Figure 1: Quarter-to-quarter changes in employment, Q1: 2020 to Q1: 2025**

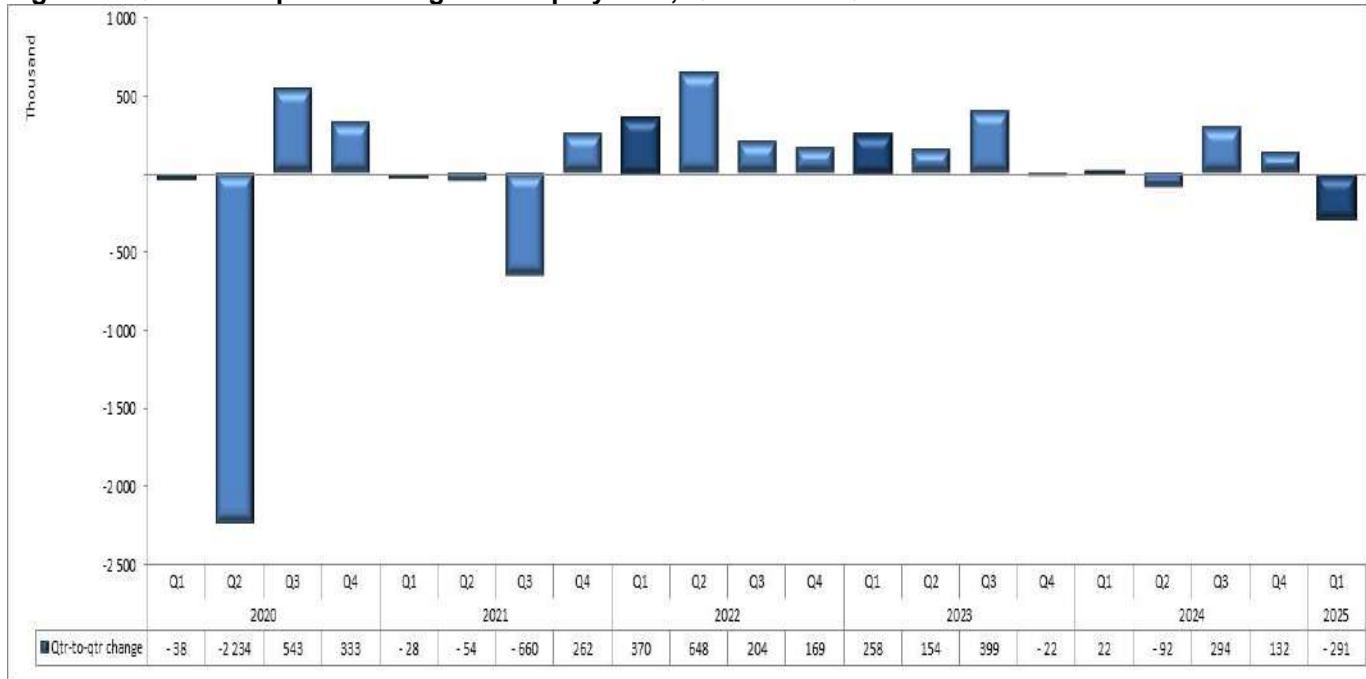

Figure 1 shows that, following an increase of 132 000 in the previous quarter, employment decreased by 291 000 in the first quarter of 2025. As depicted in Figure 1, employment has been increasing in the first quarter of each year since 2022, except for the decrease observed in 2025.

**Table B: Employment by industry**

Industry	Jan-Mar 2024	Oct-Dec 2024	Jan-Mar 2025	Qtr-to- qtr change	Year-on- year change	Qtr-to- qtr change	Year-on- year change
Total*	16 745	17 078	16 787	-291	43	-1,7	0,3
Agriculture	941	924	930	6	-11	0,7	-1,2
Mining	454	466	431	-35	-24	-7,5	-5,2
Manufacturing	1 606	1 675	1 677	2	71	0,1	4,4
Utilities	105	111	145	35	40	31,6	38,1
Construction	1 215	1 359	1 240	-119	25	-8,8	2,0
Trade	3 471	3 421	3 228	-194	-244	-5,7	-7,0
Transport	1 062	1 064	1 131	67	69	6,3	6,5
Finance	2 914	2 948	3 008	60	94	2,0	3,2
Community and social services	3 791	3 959	3 914	-45	123	-1,1	3,2
Private households	1 178	1 146	1 078	-68	-100	-6,0	-8,5

\*Note: Total includes 'Other' industries.

Due to rounding, numbers do not necessarily add up to totals.

Note: Utilities refer to electricity, gas and water supply.

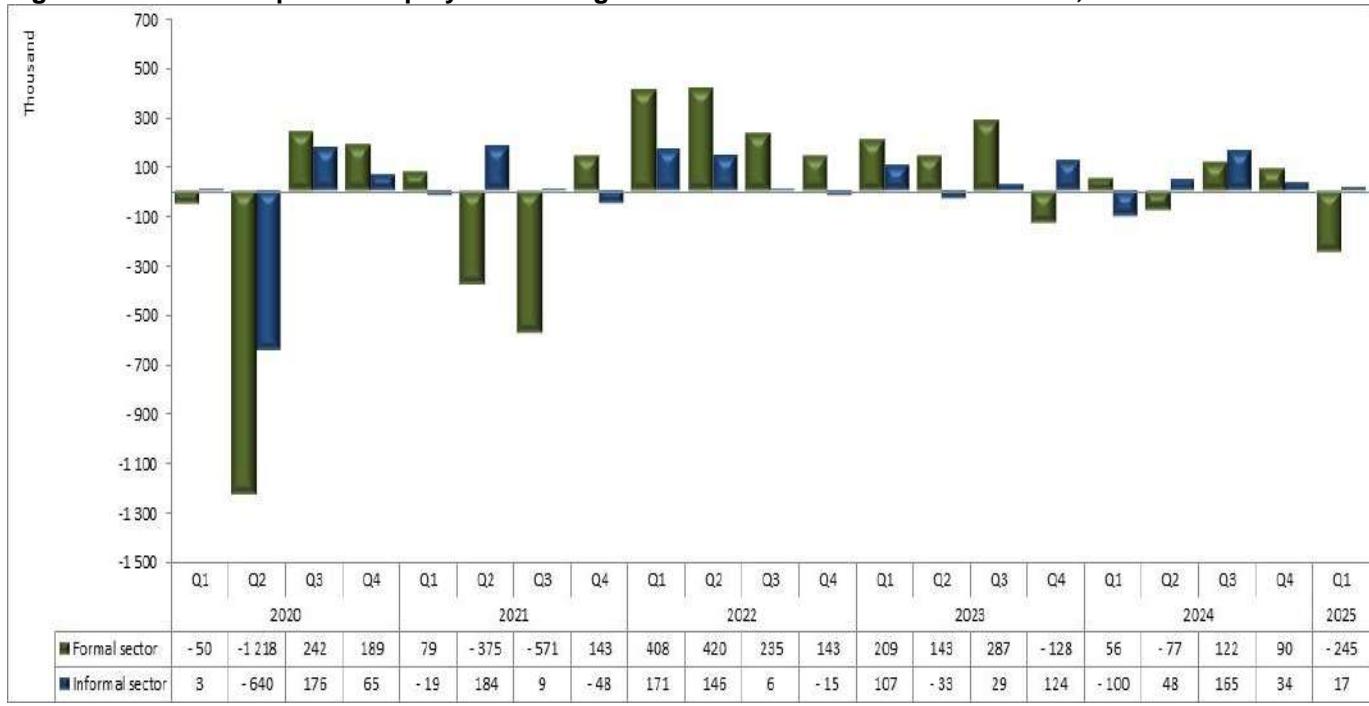

Trade refers to wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods; hotels and restaurants.

Finance refers to financial intermediation, insurance, real estate and business services.

Table B shows that between Q4: 2024 and Q1: 2025, the number of employed persons decreased in five of the ten industries. The decreases in employment were recorded in the Trade (194 000), followed by Construction (119 000), Private households (68 000), Community and social services (45 000) and Mining (35 000) industries. The largest increases in employment were recorded in Transport (67 000), followed by Finance (60 000) and Utilities (35 000) industries.

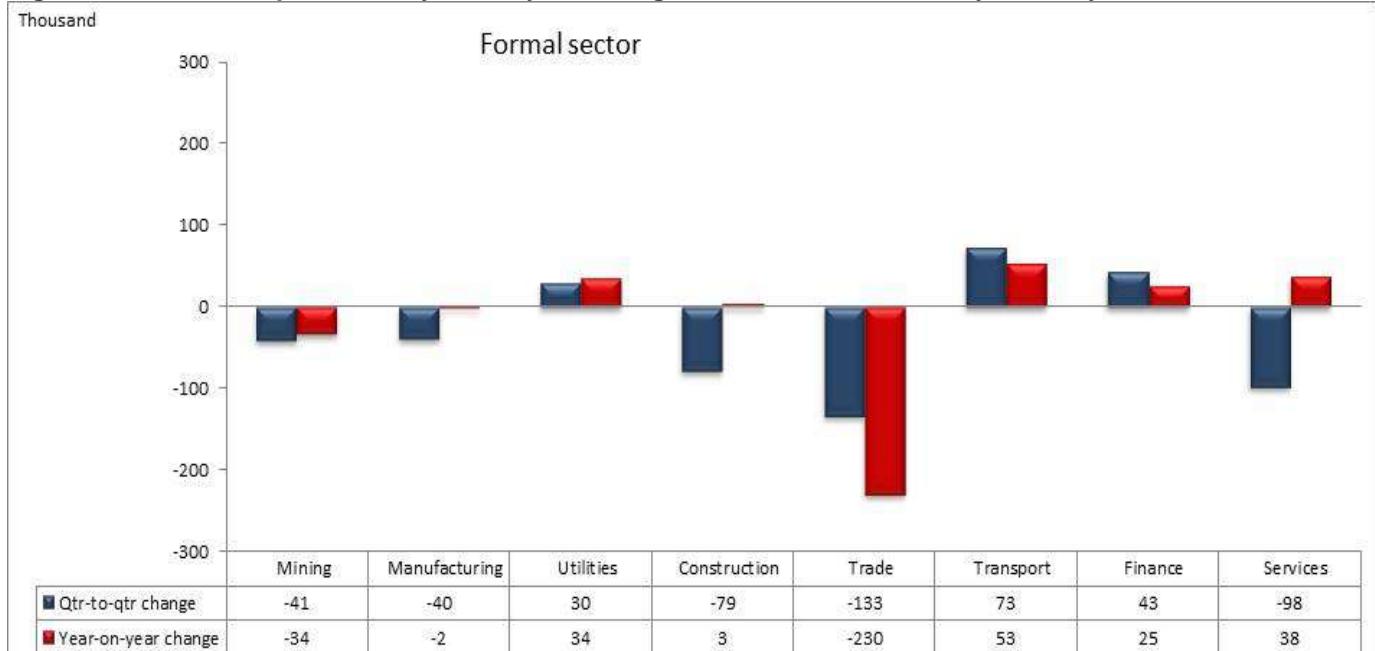

Compared with the same period last year, a net increase of 43 000 in total employment in Q1: 2025 was largely due to increases in the number of people employed in the Community and social services (123 000), Finance (94 000), Manufacturing (71 000) and Transport (69 000) industries. The industries that recorded decreases were Trade (244 000), Private households (100 000), Mining (24 000) and Agriculture (11 000).

**Figure 2: Quarter-to-quarter employment changes in the formal and informal sectors, Q1: 2020 to Q1: 2025**

Employment in the formal sector decreased by 245 000 in Q1: 2025 compared with Q4: 2024. Following an increase of 34 000 in Q4: 2024, informal sector employment increased by 17 000 in Q1: 2025.

**Figure 3: Quarter-to-quarter and year-on-year changes in the formal sector by industry**

Note: Utilities refer to electricity, gas and water supply.

Trade refers to wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods; hotels and restaurants.

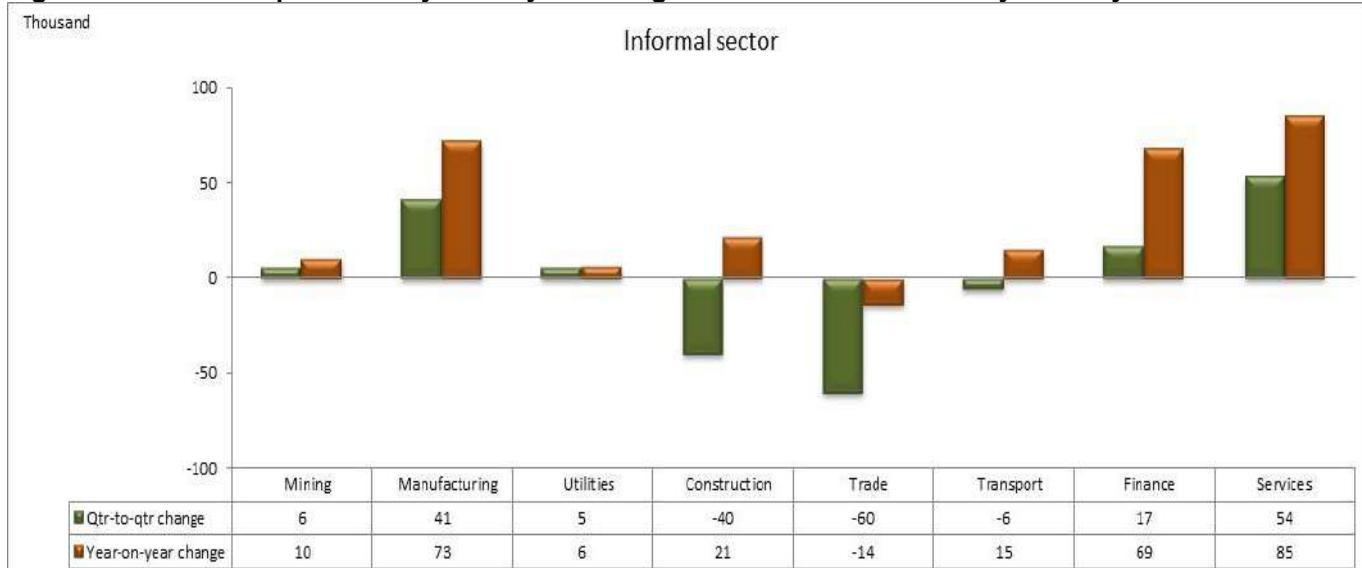

Finance refers to financial intermediation, insurance, real estate and business services.

Services refers to community, personal and social services.

The first quarter of 2025 recorded formal sector employment decreases in the Trade (133 000), Community and social services (98 000), Construction (79 000), Mining (41 000) and Manufacturing (40 000) industries compared with the fourth quarter of 2024. During the same period, increases in the formal sector employment were recorded in Transport (73 000), Finance (43 000) and Utilities (30 000).

Compared with a year ago, a net loss of 110 000 jobs in the formal sector employment was mainly driven by Trade (230 000) and Mining (34 000) industries in Q1: 2025. Employment gains were observed in Transport (53 000), Community and social services (38 000), Utilities (34 000), Finance (25 000) and Construction (3 000) industries during the same period.

**Figure 4: Quarter-to-quarter and year-on-year changes in the informal sector by industry**

Note: Utilities refer to electricity, gas and water supply.

Trade refers to wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods; hotels and restaurants.

Finance refers to financial intermediation, insurance, real estate and business services.

Services refers to community, personal and social services.

In the first quarter of 2025, informal sector employment increased by 17 000 persons compared with the previous quarter. Gains in the informal sector employment were mainly driven by the Community and social services (54 000), Manufacturing (41 000) and Finance (17 000) industries. Compared with Q1: 2024, the employment increase in the informal sector was mainly driven by Community and social services (85 000), Manufacturing (73 000) and Finance (69 000) industries. Employment loss was recorded in the Trade (14 000) industry during the same period.

**Table C: Employment by occupation**

Occupation	Jan-Mar 2024	Oct-Dec 2024	Jan-Mar 2025	Qtr-to-qtr change	Year-on- year change	Qtr-to-qtr change	Year-on- year change
	Thousand					Per cent	
<b>Total*</b>	<b>16 745</b>	<b>17 078</b>	<b>16 787</b>	<b>-291</b>	<b>43</b>	<b>-1,7</b>	<b>0,3</b>
Manager	1 303	1 496	1 430	-65	127	-4,4	9,7
Professional	1 229	869	980	111	-249	12,8	-20,3
Technician	1 590	1 398	1 503	105	-87	7,5	-5,5
Clerk	1 808	1 897	1 854	-43	46	-2,3	2,5
Sales and services	2 746	2 949	2 929	-20	183	-0,7	6,7
Skilled agriculture	94	71	62	-10	-32	-13,4	-34,2
Craft and related trade	1 693	1 932	1 862	-70	169	-3,6	10,0
Plant and machine operator	1 568	1 389	1 386	-4	-182	-0,3	-11,6
Elementary	3 845	4 215	3 964	-251	119	-5,9	3,1
Domestic worker	869	861	818	-43	-51	-5,0	-5,8

\*Note: Total includes 'Other' occupations.

Due to rounding, numbers do not necessarily add up to totals.

Eight out of the ten occupational categories recorded employment losses in Q1: 2025 compared with Q4: 2024. Large decreases in employment were observed in Elementary occupations (251 000), followed by Craft and related trade (70 000), Managerial (65 000) and Clerical and Domestic worker (43 000 each) occupations. During the same period, employment gains were recorded in Professional occupations (111 000) and Technician (105 000) occupations.

Year-on-year gains in employment were mainly driven by Sales and services occupations (183 000), followed by Craft and related trade occupations (169 000), Managerial (127 000) and Elementary (119 000) occupations. The losses in employment were recorded among Professionals (249 000), Plant and machine operators (182 000), Technician (87 000), Domestic worker (51 000) and Skilled agriculture (32 000) occupations.

**Table D: Employment by province**

Province	Jan-Mar 2024	Oct-Dec 2024	Jan-Mar 2025	Qtr-to-qtr change	Year-on- year change	Qtr-to-qtr change	Year-on- year change
	Thousand					Per cent	
	South Africa	16 745	17 078	16 787	-291	43	-1,7
Western Cape	2 740	2 812	2 861	49	121	1,8	4,4
Eastern Cape	1 344	1 455	1 373	-83	29	-5,7	2,2
Northern Cape	331	355	343	-12	12	-3,4	3,5
Free State	742	750	754	4	12	0,5	1,6
KwaZulu-Natal	2 891	2 892	2 788	-104	-103	-3,6	-3,6
North West	899	935	879	-57	-20	-6,0	-2,2
Gauteng	5 061	5 081	5 091	9	30	0,2	0,6
Mpumalanga	1 242	1 255	1 212	-43	-30	-3,4	-2,5
Limpopo	1 495	1 543	1 488	-55	-7	-3,6	-0,5

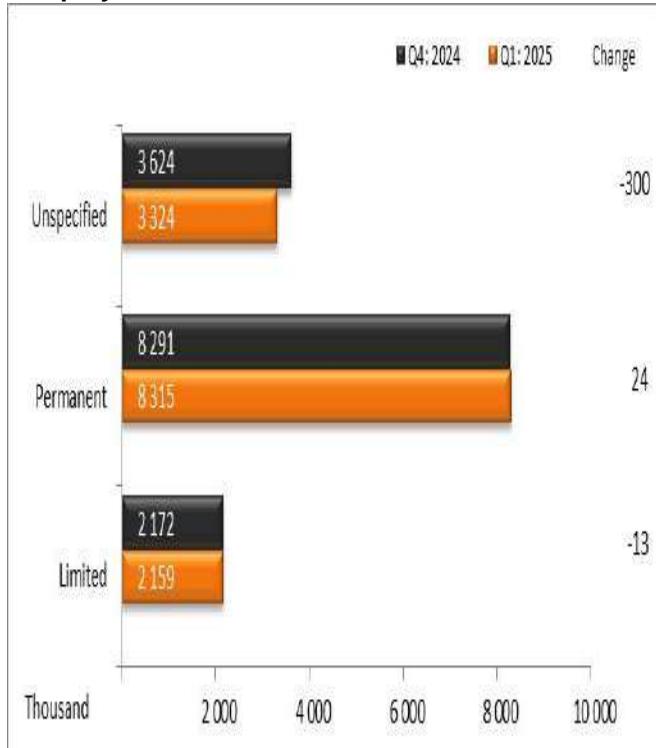

*Due to rounding, numbers do not necessarily add up to totals.*

Table D shows that the number of employed persons decreased in six provinces between Q4: 2024 and Q1: 2025. Employment losses were recorded in KwaZulu-Natal (104 000), Eastern Cape (83 000), North West (57 000), Limpopo (55 000), Mpumalanga (43 000) and Northern Cape (12 000). Employment increases were recorded in Western Cape (49 000), Gauteng (9 000) and Free State (4 000) during the same period.

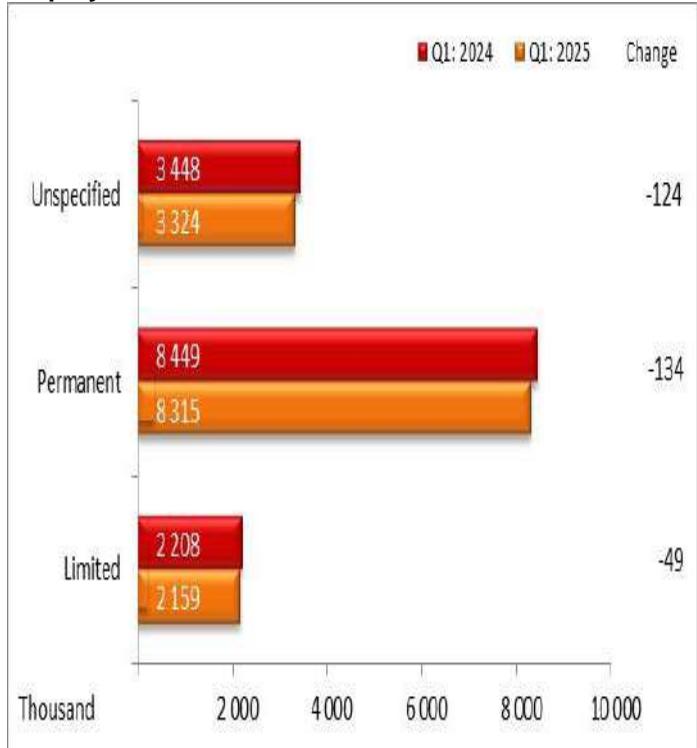

Compared with Q1: 2024, the largest increases in employment were recorded in Western Cape (121 000), Gauteng (30 000) and Eastern Cape (29 000). Northern Cape and Free State were the provinces that recorded the lowest increase in employment with 12 000 each during the same period. The decreases in employment were recorded in KwaZulu-Natal (103 000), Mpumalanga (30 000), North West (20 000) and Limpopo (7 000).

### 3.1 Conditions of employment for employees

**Figure 5: Quarter-to-quarter changes in nature of employment contract**

**Figure 6: Year-on-year changes in nature of employment contract**

Figures 5 and 6 show that the majority of employees had permanent employment contracts. Between the fourth quarter of 2024 and first quarter of 2025, the number of employees with contracts of a permanent nature increased by 24 000, while the number of employees with contracts of unspecified duration and those with contracts of limited duration decreased by 300 000 and 13 000 respectively.

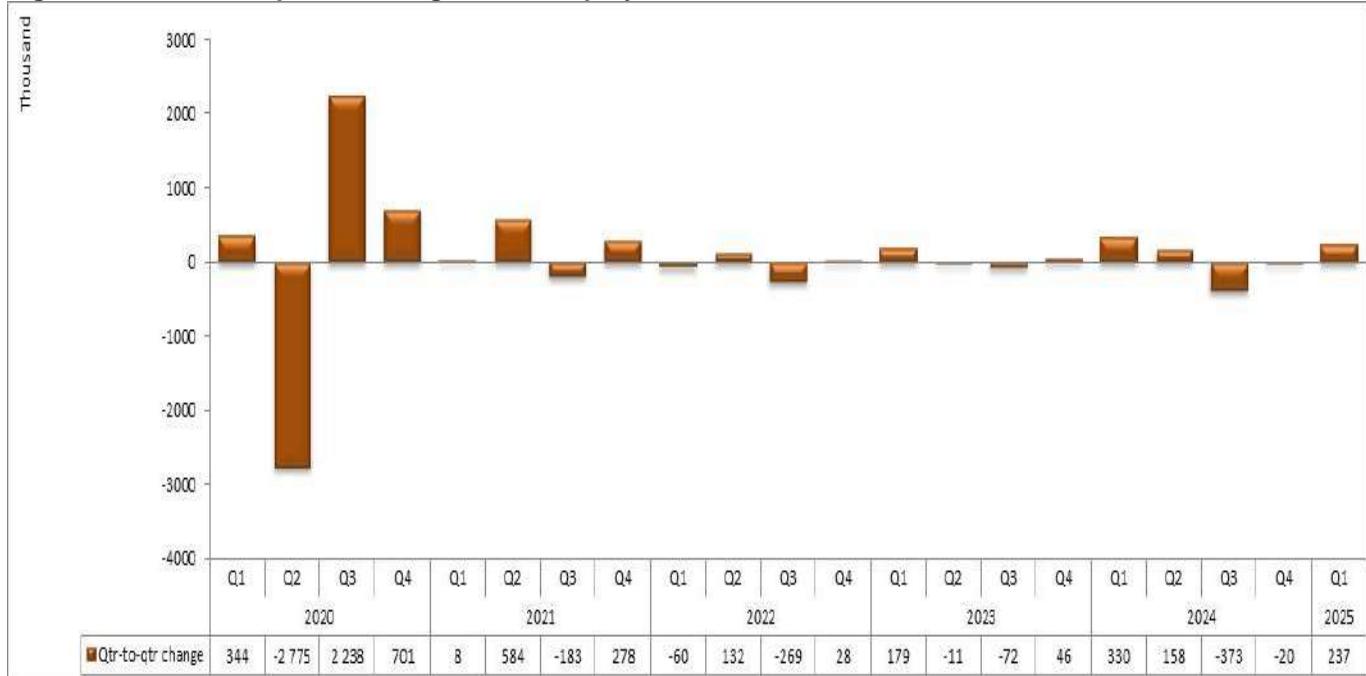

Year-on-year comparisons indicated that the number of employees decreased among all natures of employment contracts. Those with contracts of a permanent nature decreased by 134 000, employees with contracts of an unspecified duration decreased by 124 000 and those with contracts of a limited duration decreased by 49 000.

## 4. Unemployment and not in employment, education or training (NEET)

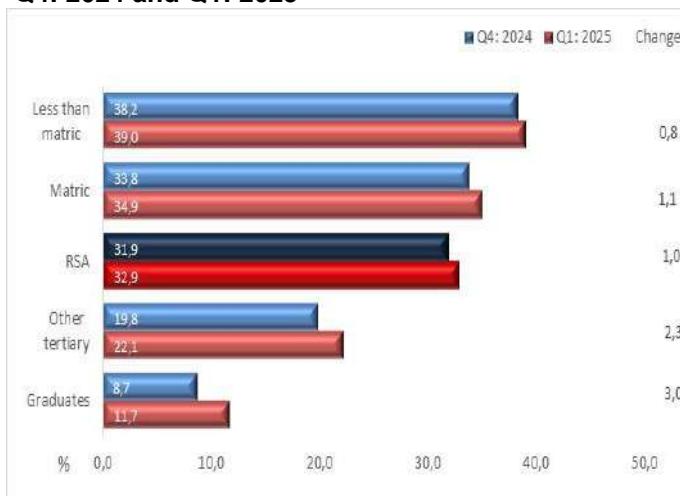

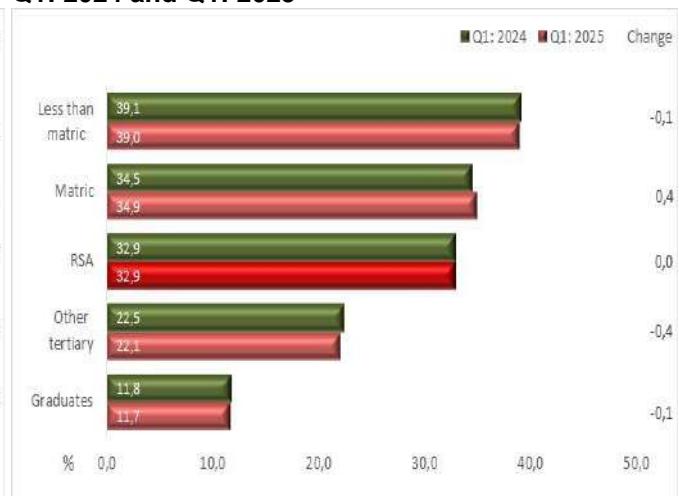

### 4.1 Unemployment

There are two definitions of unemployment that are used: the official and the expanded definition of unemployment (refer to technical notes).

**Figure 7: Quarter-to-quarter changes in unemployment, Q1: 2020 to Q1: 2025**

Unemployed persons increased by 237 000 in Q1: 2025 following a decrease of 20 000 in the previous quarter. Notable from Figure 7 is that unemployment has always increased in the first quarter of each year except for a decline observed in 2022.

**Figure 8a: Unemployment rate by education level, Q4: 2024 and Q1: 2025****Figure 8b: Unemployment rate by education level, Q1: 2024 and Q1: 2025**

*Due to rounding, numbers do not necessarily add up to totals.*

Figures 8a and 8b illustrate the significant impact of education on mitigating a nation's unemployment rate. Possessing a tertiary education, especially a degree, enhances one's likelihood of securing employment. In Q1: 2025, individuals without matric recorded an unemployment rate of 39,0% (up by 0,8 of a percentage point), while graduates had a rate of 11,7% (up by 3,0 percentage points) compared with the previous quarter. Unemployment rates for those with matric or lower educational qualifications exceeded the national rate, whereas individuals with other tertiary qualifications and graduates had rates below the national unemployment rate. Year-on-year comparisons indicated that the unemployment rate decreased among all education levels, except for those with matric where it increased by 0,4 of a percentage point.

**Table E: Unemployment rate by province**

	Official unemployment rate					Expanded unemployment rate				
	Jan-Mar 2024	Oct-Dec 2024	Jan-Mar 2025	Qtr-to-qtr change	Year-on-year change	Jan-Mar 2024	Oct-Dec 2024	Jan-Mar 2025	Qtr-to-qtr change	Year-on-year change
	Per cent		Percentage points			Per cent		Percentage points		
South Africa	32,9	31,9	32,9	1,0	0,0	41,9	41,9	43,1	1,2	1,2
Western Cape	21,4	19,6	19,6	0,0	-1,8	26,1	24,8	24,7	-0,1	-1,4
Eastern Cape	42,4	36,6	39,3	2,7	-3,1	49,1	47,6	49,0	1,4	-0,1
Northern Cape	28,3	27,4	29,5	2,1	1,2	41,7	39,7	43,0	3,3	1,3
Free State	38,0	37,9	37,9	0,0	-0,1	45,1	44,2	44,8	0,6	-0,3
KwaZulu-Natal	29,9	28,6	32,3	3,7	2,4	43,7	44,7	46,9	2,2	3,2
North West	40,5	41,3	40,4	-0,9	-0,1	53,6	52,8	56,0	3,2	2,4
Gauteng	34,2	34,4	34,7	0,3	0,5	38,9	39,9	40,0	0,1	1,1
Mpumalanga	36,2	34,7	35,4	0,7	-0,8	47,0	47,2	49,3	2,1	2,3
Limpopo	32,7	31,9	33,3	1,4	0,6	47,8	46,5	48,6	2,1	0,8

The official unemployment rate increased by 1,0 percentage point to 32,9% in Q1: 2025 compared with Q4: 2024. The official unemployment rate increased in six of the nine provinces. The largest increases were recorded in KwaZulu-Natal (3,7 percentage points), followed by Eastern Cape (2,7 percentage points) and Northern Cape (2,1 percentage points). A decrease in the unemployment rate was recorded only in North West (0,9 of a percentage point), while Western Cape and Free State remained unchanged.

Year-on-year, the official unemployment rate remained unchanged. The official unemployment rate decreased in five provinces. The decreases in the unemployment rate were recorded in Eastern Cape (3,1 percentage points), followed by Western Cape (1,8 percentage points), Mpumalanga (0,8 of a percentage point), Free State and North West (0,1 of a percentage point each). The increases in the unemployment rate were recorded in KwaZulu-Natal (2,4 percentage points), Northern Cape (1,2 percentage points), Limpopo (0,6 of a percentage point) and Gauteng (0,5 of a percentage point).

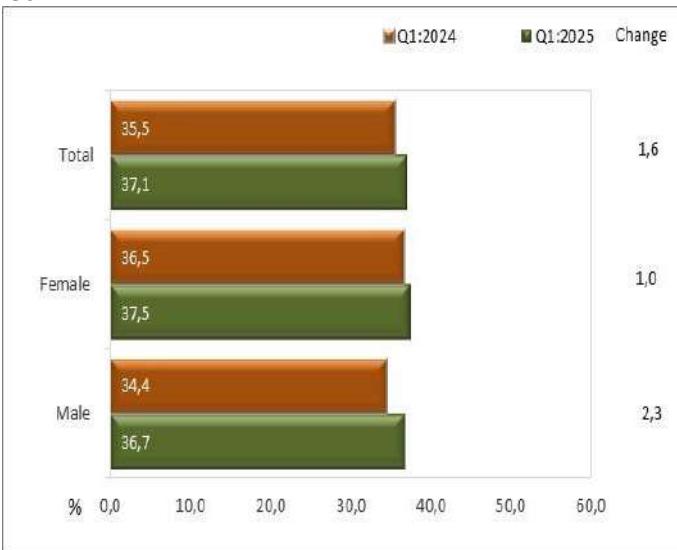

The expanded unemployment rate increased by 1,2 percentage points in Q1: 2025 compared with Q4: 2024. The expanded unemployment rate increased in all provinces except Western Cape, where it decreased by 0,1 of a percentage point. The largest increases were recorded in Northern Cape (3,3 percentage points), followed by North West (3,2 percentage points), KwaZulu-Natal (2,2 percentage points), Mpumalanga and Limpopo (2,1 percentage points each).

Compared with the same period last year, the expanded unemployment rate increased by 1,2 percentage points in Q1: 2025. Six out of the nine provinces recorded increases in the expanded unemployment rate. The largest increases in the expanded unemployment rate were recorded in KwaZulu-Natal (3,2 percentage points), followed by North West (2,4 percentage points) and Mpumalanga (2,3 percentage points). Decreases in the expanded unemployment rate were recorded in Western Cape (1,4 percentage points), Free State (0,3 of a percentage point) and Eastern Cape (0,1 of a percentage point).

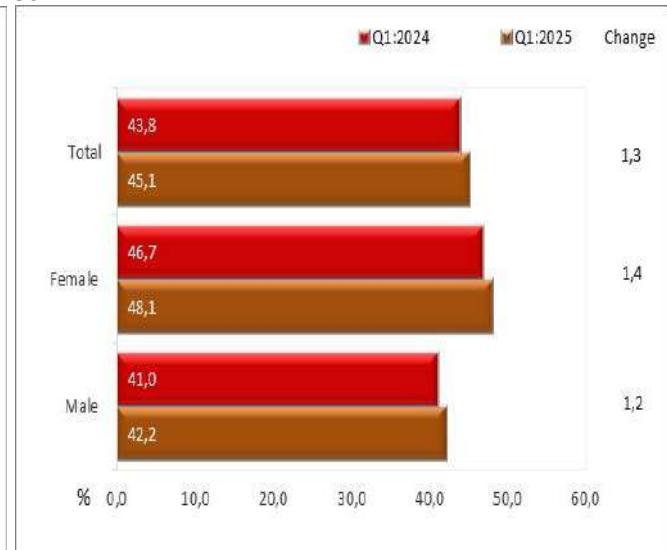

## 4.2 Not in employment, education or training (NEET)

Some young people have been disengaged from the labour market, and they are also not building on their skills base through education and training – they are not in employment, education or training (NEET). The NEET rate serves as an important additional labour market indicator for young people.

**Figure 9a: NEET rate for youth aged 15–24 years by sex**

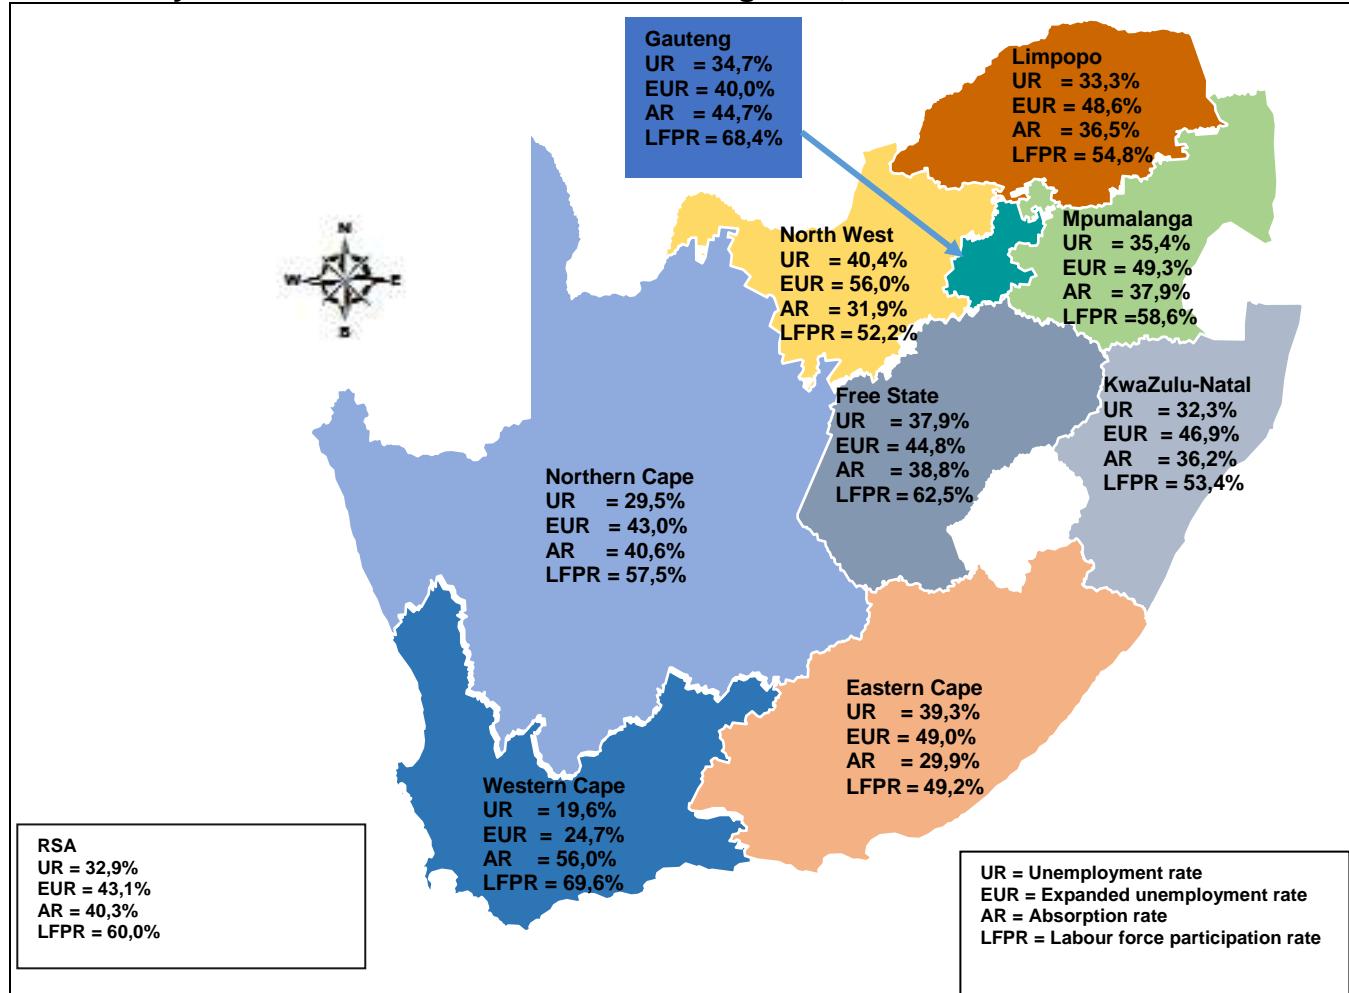

**Figure 9b: NEET rate for youth aged 15–34 years by sex**

There were about 10,3 million young people aged 15–24 years in Q1: 2025, of which 37,1% were not in employment, education or training. This is 1,6 percentage points higher than the NEET rate in Q1: 2024. In this age group, the NEET rate for females increased by 1,0 percentage point and for males it increased by 2,3 percentage points. The NEET rate for females was higher than that of their male counterparts in both years (Figure 9a).

Compared with Q1: 2024, the percentage of young persons aged 15–34 years who were NEET increased by 1,3 percentage points from 43,8% to 45,1% in Q1: 2025. The NEET rate for males increased by 1,2 percentage points, and for females the rate increased by 1,4 percentage points. In both Q1: 2024 and Q1: 2025, more than four in every ten young people were not in employment, education or training (Figure 9b).

## 5. Summary of the labour market measures at a glance, Q1: 2025

**Figure 14: Unemployment rate by education status, Q1: 2017 to Q1: 2025**

## 7. The Quarterly Labour Force Survey (QLFS) and the Quarterly Employment Survey (QES)

Stats SA conducts two official sources of employment statistics surveys: QES (which is establishment-based) and QLFS (which is household-based). Each survey has its strengths and limitations. For example, QES cannot provide information on the following:

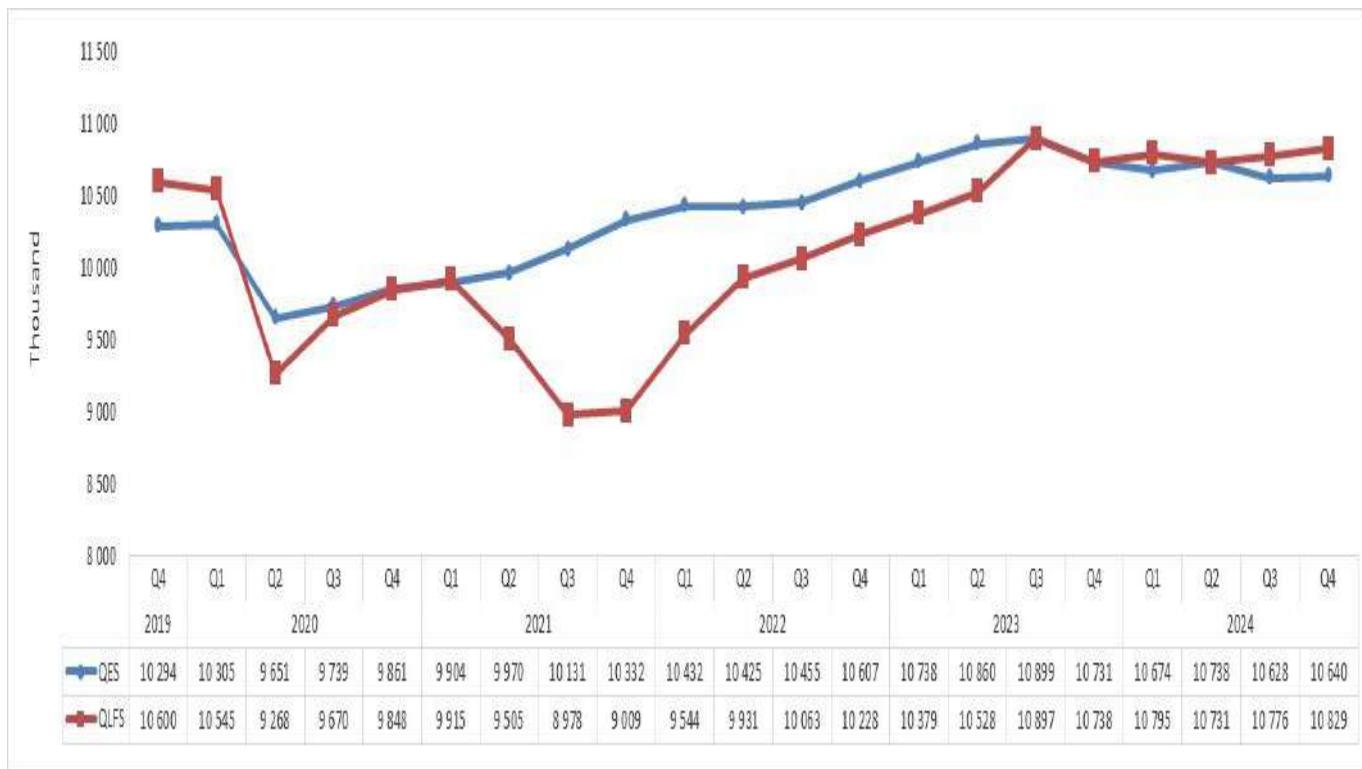

- description of the employed, e.g. their demographic profile, education level, hours of work, etc.; and
- unemployment and descriptors of the unemployed.

QLFS is a survey of households that collects information from approximately 30 000 dwelling units and collects data on the labour market activities of individuals, whereas QES is an enterprise-based survey that collects information from non-agricultural businesses and organisations from approximately 20 000 units. Numerous conceptual and methodological differences between the household- and enterprise-based surveys result in important distinctions in employment estimates derived from surveys. Among these are:

- The household-based survey includes agricultural workers, self-employed workers whose businesses are unincorporated, unpaid family workers, and private household workers among the employed; these groups are excluded from the enterprise-based QES survey.
- The household-based survey is limited to workers 15 years of age and older, whereas the enterprise-based survey is not limited by age.
- The household-based survey has no duplication of individuals because individuals are counted only once, even if they hold more than one job. In the enterprise-based survey, employees working at more than one job and thus appearing on more than one payroll are counted separately for each appearance.
- QLFS includes income tax, VAT and a number of employees in determining the formal sector, while QES surveys enterprises with only VAT with annual turnover greater than R300 000.
- QLFS allows for proxy responses (a household member responding on behalf of the other). This can introduce misclassification of items, e.g. formal/informal classification.

**Table F: Key differences between the QLFS and the QES**

		<b>QLFS</b>	<b>QES</b>
<b>Coverage</b>		Private households and workers' hostels Non-institutional population (15 years and older) Total employment (including Informal sector, Private households, Agriculture and small businesses)	Payroll of VAT-registered businesses Employees only Formal sector, excluding Agriculture
<b>Sample size</b>		Quarterly sample of approximately 30 000 dwellings in which households reside	Quarterly sample of 20 000 non-agricultural formal- sector businesses
<b>Reference period</b>		One week prior to the interview	Payroll on the last day of the quarter
<b>Standard Industrial Classification (SIC)</b>		All industries	Excluding Agriculture and Private households
<b>Formal sector definition (excluding Agriculture and Private households)</b>		Employers and own-account workers registered for VAT or income tax Employees paying income tax and those not paying tax but working in firms with five or more workers	Employees on a payroll of VAT-registered businesses

**Figure 15: Formal sector (non-agricultural) employment trends in QLFS and QES, Q4: 2019 to Q4: 2024 (employees only)**

## 8. Technical notes

### 8.1 Response details

**Table G: Response rates by province and metropolitan area**

Province / metropolitan area	Oct-Dec 2024	Jan-Mar 2025
<b>National</b>	<b>88,2</b>	<b>88,3</b>
<b>Western Cape</b>	<b>86,0</b>	<b>85,2</b>

### 8.2 Survey requirements and design

QLFS uses the Master Sample frame that has been developed as a general-purpose household survey frame that can be used by all other Stats SA household-based surveys having design requirements that are reasonably compatible with the QLFS. The 2013 Master Sample is based on information collected during the 2011 Census conducted by Stats SA. In preparation for Census 2011, the country was divided into 103 576 enumeration areas (EAs). Census EAs, together with auxiliary information for the EAs, were used as frame units or building blocks for formation of primary sampling units (PSUs) for the Master Sample. They covered the entire country and had other information that is crucial for stratification and creation of PSUs. There are 3 324 primary sampling units (PSUs) in the Master Sample, with an expected sample of approximately 33 000 dwelling units (DUs). The number of PSUs in the current Master Sample (3 324) reflects an 8,0% increase in the size of the Master Sample compared with the previous Master Sample in 2008 (which had 3 080 PSUs). The larger Master Sample of PSUs was selected to improve precision (smaller coefficients of variation, known as CVs) of the QLFS estimates.

The Master Sample is designed to be representative at provincial level and at metro/non-metro levels. Within metros, the sample is further distributed by geographical type. The three geography types used are Urban, Tribal and Farms. This implies, for example, that within a metropolitan area the sample is representative of different geography types that may exist within that metro.

It is divided equally into four subgroups or panels called rotation groups. Rotation groups are designed in such a way that each of these groups has the same distribution pattern as that which is observed in the whole sample. They are numbered from one (1) to four (4), and these numbers also correspond to the quarters of the year in which the sample will be rotated for the particular group.

A sample for the QLFS is based on a stratified two-stage design with probability proportional to size (PPS) sampling of PSUs in the first stage, and sampling of dwelling units (DUs) with systematic sampling in the second stage.

### **8.3 Sample rotation**

For each quarter of the QLFS, a quarter of the sampled dwellings are rotated out of the sample. These dwellings are replaced by new dwellings from the same PSU or the next PSU on the list. Thus, sampled dwellings are expected to remain in the sample for four consecutive quarters. It should be noted that the sampling unit is the dwelling, and the unit of observation is the household. Therefore, if a household moves out of a dwelling after being in the sample for two quarters (for example) and a new household moves in, the new household will be enumerated for the next two quarters. If no household moves into the sampled dwelling, the dwelling will be classified as vacant (or unoccupied).

### **8.4 Weighting**

Sample weights were constructed in order to account for: the original selection probabilities (design weights); adjustments for PSUs that were sub-sampled or segmented; excluded population from the sampling frame (EAs with insufficient DUs); non-response; weight trimming; benchmarking to known population estimates from the Demographic Analysis Chief Directorate within Stats SA.

#### **8.4.1 Non-response adjustment**

In general, imputation is used for item non-response (i.e. blanks within the questionnaire) and edit failures (i.e. invalid or inconsistent responses). Eligible households in sampled dwellings can be divided into two response categories: respondents and non-respondents. Weight adjustment is applied to account for the non-respondent households (e.g. refusal, no contact, etc.). Adjustment for total non-response was computed at two levels of non-response: PSU non-response and household non-response.

#### **8.4.2 Calibrated survey weights**

Calibrated sample weights are constructed such that all individuals within a household are assigned the same adjusted base weight. Adjusted base weights are calibrated such that the aggregate totals will match with independently derived population estimates (from the Stats SA Demographic Analysis Chief Directorate) for various age, race and gender groups at national level and individual metropolitan and non-metropolitan area levels within provinces. Calibrated weights are constructed using the constraint that each person within the same household, should have the same calibrated weight, with a lower bound on the calibrated weights set at 50.

## 8.5 Estimation

Final survey weights are used to obtain the estimates for various domains of interest, e.g. number of persons employed in Agriculture in Western Cape, the number of females employed in Manufacturing, etc.

## 8.6 Reliability of the survey estimates

Since estimates are based on sample data, they differ from figures that would have been obtained from complete enumeration of the population using the same instrument. Results are subject to both sampling and non-sampling errors. Non-sampling errors include biases from inaccurate reporting, processing, and tabulation, etc., as well as errors from non-responses and incomplete reporting. These types of errors cannot be measured readily. However, to some extent, non-sampling errors can be minimised through the procedures used for data collection, editing, quality control, and non-response adjustment. The variances of the survey estimates are used to measure sampling errors.

### (i) Variance estimation

Most commonly used methods for estimating variances of survey estimates from complex surveys such as the QLFS are the Taylor-series Linearization, Jack-knife Replication, Balanced Repeated Replication (BRR), and Bootstrap methods (Wolter, 2007).<sup>1</sup> The Fay's BRR method has been used for variance estimation in the QLFS because of its simplicity.

### (ii) Coefficient of variation

It is more useful in many situations to assess the size of standard error relative to magnitude of the characteristic being measured (the standard error is defined as the square root of the variance). The **coefficient of variation (cv)** provides such a measure. It is the **ratio of the standard error of the survey estimate to the value of the estimate itself expressed as a percentage**. It is very useful in comparing the precision of several different survey estimates, where their sizes or scales differ from one another.

### (iii) P-value of an estimate of change

The p-value corresponding to an estimate of change is the probability of observing a value larger than the particular observed value under the hypothesis that there is no real change. If the p-value <0,01, the difference is highly significant; if p-value is between 0,01 and 0,05, the difference is significant; and if p-value >0,05, the difference is not significant.

## 9. Definitions

**Discouraged work-seeker** is a person who was not employed during the reference period, wanted to work, was available to work/start a business but did not take active steps to find work during the last four weeks, provided that the main reason given for not seeking work was any of the following: no jobs available in the area; unable to find work requiring his/her skills; lost hope of finding any kind of work.

**Economic activities** are those activities that contribute to the production of goods and services in the country. There are two types of economic activities, namely: (1) Market production activities (work done for others and usually associated with pay or profit); and (2) Non-market production activities (work done for the benefit of the household, e.g. subsistence farming).

**Employed** persons are those aged 15–64 years who, during the reference week, did any work for at least one hour, or had a job or business but were not at work (i.e. were temporarily absent).

**Employment-to-population ratio (labour absorption rate)** is the proportion of the working-age population that is employed.

---

<sup>1</sup>Wolter, K.M. 2007. *Introduction to Variance Estimation, 2<sup>nd</sup> Edition*. New York: Springer-Verlag.

**Informal employment** identifies persons who are in precarious employment situations, irrespective of whether or not the entity for which they work is in the formal or informal sector. Persons in informal employment, therefore, comprise all persons in the informal sector, employees in the formal sector, and persons working in private households who are not entitled to or receive basic benefits such as pension or medical aid contributions from their employer, and who do not have a written contract of employment.

**Informal sector:** The informal sector has the following two components:

- i) employees working in establishments that employ fewer than five employees, who do not deduct income tax from their salaries/wages; and
- ii) employers, own-account workers and persons helping unpaid in their household business who are not registered for either income tax or value-added tax.

The **labour force** comprises all persons who are employed, plus all persons who are unemployed.

**Labour force participation rate** is the proportion of the working-age population that is either employed or unemployed.

**Long-term unemployment:** Persons in long-term unemployment are those individuals among the unemployed who were without work and trying to find a job or start a business for one year or more.

**Not economically active:** Persons aged 15–64 years who are neither employed nor unemployed in the reference week.

Persons in **underemployment (time-related)** are employed persons who were willing and available to work additional hours, whose total number of hours actually worked during the reference period were below 35 hours per week.

**Under-utilised labour** comprises three groups that are defined as follows: persons who are underemployed, persons who are unemployed, and persons who are discouraged.

**Unemployed** persons according to the **Official definition** are those (aged 15–64 years) who:

- a) were not employed in the reference week; **and**
- b) actively looked for work or tried to start a business in the four weeks preceding the survey interview; **and**
- c) were available for work, i.e. would have been able to start work or a business in the reference week; **or**
- d) had not actively looked for work in the past four weeks but had a job or business to start at a definite date in the future and were available.

**Unemployed** persons according to the **Expanded definition** are those (aged 15–64 years) who:

- a) fall under official unemployment (searched and available); **and**
- b) were available to work but are/or:
  - discouraged work-seekers
  - have other reasons for not searching

**Unemployment rate** is the proportion of the labour force that is unemployed.

The **working-age population** comprises all persons aged 15–64 years.

Not economically active	292	261	256	244	254	10	-38	4,0	-13,1	

For all values of 10 000 or lower, the sample size is too small for reliable estimates.

Due to rounding, numbers do not necessarily add up to totals.

## Appendix 2
